

# CPD

“ I would recommend Eddie to any educators seeking to develop their teaching methodology with the confidence that they will receive instruction from a highly professional individual with a depth and breadth of technical and educational expertise.”

**Stephen Stott,**  
Education Program Manager  
Autodesk Inc.,  
Europe, Middle East & Africa

“ You delivered the best inset experience I have ever received in twenty five years of teaching. Your video tutorials are superb, thanks. We will definitely be subscribing to your website.”

**Steve Mylchreest,**  
Head of Design & Tech.  
Perth Academy

## COURSE CONTENTS

Description of File Types

Introduction to the Interface

First Simple Models

Sketching Hints

Some Basic Modeling Tools

Introduction to Workplanes

Simple Lofting

Producing Orthographics

Rendering With Inventor Studio

Assembly Techniques

## INTRODUCTION TO INVENTOR

Covering the basics of how to operate Inventor in addition to an insight into effective teaching strategies.

**Date :** By arrangement

**Time :** Six hours

**Venue :** Your premises

**Numbers :** Maximum 20

**Cost :** £550 + travel

This one day course is aimed at Design & Technology teachers in High Schools who are taking their initial steps with Autodesk Inventor.

The cost includes teaching material used in the delivery of the course on the day which can be used for future learning and teaching in the centre. All courses are recorded live and provided in the form of video tutorial material to participants.

Bearing in mind that it is perfectly possible to negotiate content, shown in the panel on the left is the structure of a typical, one day, introductory course in Autodesk Inventor.

Course Tutor, **Eddie Mack**, has over fifteen years experience teaching Design & Technology in both Secondary and Higher Education and will ensure you feel supported.

Participants can be assured of feeling they made the best use of their valuable CPD time during the course and in the vital weeks after when they are able to play back the day's sessions while consolidating their learning.
